INSTALLING DRIVER SOFTWARE TO YOUR COMPUTER

WARNING: You must install driver software before connecting the Digital Photo Keychain to your computer. Otherwise, it may suffer permanent damage. Installing the driver software allows you to download photos from your PC or MAC onto the Digital Photo Keychain. When installing the driver software, close any open programs and ensure virus software is disabled. After installation, restart your computer before downloading photos.

NOTE: The Digital Photo Keychain should not be connected to your computer before or during the driver software installation.

WINDOWS:

1. Insert the driver software CD into your computer's CD-ROM drive.
2. Your system might recognize the software automatically, if not, go to "My Computer" on your computer's desktop and open the CD-ROM drive icon.
3. Run the SETUP.EXE file and follow the onscreen instructions.
4. Remove the driver software CD from your computer's CD-ROM drive.
5. Restart your computer.

MAC:

Mac

1. Insert the driver software CD into your computer's CD-ROM drive.
2. Run the Photo Viewer Install.pkg file and follow the onscreen instructions.
3. Remove the driver software CD from your computer's CD-ROM drive.
4. Restart your computer.

Connect the Digital Photo Keychain to your computer using the USB cable included. Each time you connect the USB cable, the menu will be displayed on the Digital Photo Keychain's screen. Press ▲ or ▼, to select the USB Charge mode or the USB Update mode. (NOTE: Select the USB Charge mode and allow the Digital Photo Keychain to fully charge (3 hours) before downloading any photos.

DOWNLOADING PHOTOS USING THE PHOTO VIEWER SOFTWARE

1. Connect the USB cable to your computer and Digital Photo Keychain. Press ▼ down to access the USB update mode on the Digital Photo Keychain and press the menu/power button ⏻. Your keychain will now say, "updating" and you are ready to open the software on your computer. (Please note the keychain will continue to say "updating" the entire time that you are working with the program on your computer and will change only when you safely disconnect it from the computer.)

IMPORTANT: The keychain MUST be plugged in and in "update" mode in order for you to open the Photo Viewer program. If It is not plugged in, or is in the wrong mode, you will get the following error: No photo viewer is found, program terminated!

2. Once the keychain is plugged in and in "update" mode double click the Photo Viewer icon on your desktop to launch the application.
3. Use Photo Viewer's file manager to browse photos on your computer.
4. Once you select a photo, it will show up in the crop marquee. Put the box over the area that you want to see on your keychain and click the POST button ➡. This will move your photos to the collection panel.
5. Delete any unwanted photos by selecting the image in the collection panel and clicking the X button from the menu bar.
6. Once you have all photos in the collection panel that you want on your keychain, click the "synchronize" button. At the bottom of your screen, you will see that the status has changed from "idle" to "download" and the black bar will show % complete.
7. Once the download is 100% complete and you get the following message, "photo viewer data synchronize complete", click OK, exit the program and disconnect the keychain.

IMPORTANT: Do not disconnect the Digital Photo Keychain until the download is complete and you exit the photo viewer software.

ADDITIONAL NOTES:

1. Please note that when charging from your USB cable to the computer, full charging time will take up 7 hours. If you are charging using your own DC car charger or AC wall adaptor, charging time will be much less and will take up to 3 hours.
2. Indicator light will turn green when charging is complete.
